

Title: Software Engineer / Developer (C++, C#, .NET)

Skills: C++, C#, .NET

Location: Plymouth, MI

Area Code: 734

Employment Type: Full Time

Travel: None

Telecommute: Available

Pay Rate: \$45,000+

Duration: Indefinitely (at-will)

At Stardock Corporation, we are experiencing growth and expanding our developer base in Michigan. This is a full-time, non-contracted position. In this role you will be responsible for translating requirements into retail software.

We are looking for passionate, talented developers who enjoy having important roles in designing and creating software products people use every day. You would be working in the cutting edge of the user-interface and customization software industry. The position will have a variety of responsibilities with opportunity for growth.

Applicant should demonstrate a strong sense of usability and UI design. Applicants will be expected to exhibit understanding of how consumer users work with their computers. Applicant should have a strong Object Oriented Design/Componentized-development awareness. Candidates should have previously work on a team and be self-motivated.

Developers will work both as part of a team as well as individually to design and create products for Windows XP and Vista (all versions).

Requirements (must have):

- 4+ years of Object Oriented Programming (OOP) experience
- 3+ years of Visual Studio development experience (2005 preferred)
- 3+ years C++ development. Awareness of COM a plus.
- 1+ years C# development, Microsoft .NET Framework 2.0 (both writing and debugging)
- 1+ year(s) of C/C++ experience using Win32 API
- Strong understanding of Object Oriented Design (OOD)
- Ability to work individually or as part of a team creating software

Requirements (would like to have):

- Bachelor's degree in Computer Science or equivalent
- Awareness of Windows Vista technologies
- Awareness of Windows Presentation Foundation (WPF)
- Some knowledge of Visual Basic, JavaScript, VBScript, etc
- Experience with usability, UI design and a consumer centric / business-minded approach to features

Stardock is the world's leading developer of Windows customization and enhancement utilities. Its software is used by over 10 million people worldwide and has been licensed by trendsetting companies like NVIDIA, ATI, Alienware and Microsoft, plus in movies and on TV. Stardock also makes PC strategy games that have garnered numerous industry awards and have been featured in The Wall Street Journal, Time magazine, US News & World Report, CNN, MSNBC and elsewhere. Stardock's websites are the premiere portals for desktop customization enthusiasts and are visited by millions each month. Find out more about us at [www.stardock.com](http://www.stardock.com).
