

DeskScapes® from Stardock offers corporate clients a new and exciting opportunity to put animations on the PC desktops of thousands of Windows Vista® Ultimate users. DeskScapes can replace the static Windows wallpaper with animated, full motion desktops that change depending on events. This creates a new medium to extend your company's brand onto the desktop.

Stardock's DeskScapes is an enhancement to Microsoft's Windows Vista DreamScene™ technology. With Windows Vista, Microsoft introduced the DreamScene format for animated wallpapers, including content created by Stardock Design for Microsoft. Stardock DeskScapes extends the Windows DreamScene format to support dynamic, animated wallpaper as the desktop background without slowing down your computer or interfering with how you work. Now users can have animated wallpaper that changes according to the time of day, the weather, or the season of the year or other events.

The popularity of DreamScenes and the enhancements offered through DeskScape technology from Stardock creates new opportunities for desktop marketing. Corporations can now offer animated, interactive desktops as a part of their marketing campaigns.

The Blissful Sunset desktop (shown above) was created by Stardock Design and has been used by Microsoft at numerous launch and marketing events. The gently swaying grass provides a relaxing desktop background that is perfect for the home user or even a business environment.

Desktop Earth takes advantage of the new support in DeskScapes for dynamic content. The desktop animation of the planet Earth rotates and has an accurate day into night cycle. Users can select how they want their desktop to appear. They can either set the globe in motion, slowly spinning on the screen and accurately showing which part of the world is currently under the shroud of darkness, and which is enjoying its time under the sun. As another option, users can set the view to always be of their home or work location and watch day transform into night.

On the left is an image from the Dark Avatar DreamScene.

DeskScapes provides a new channel of advertising for technology companies, movies, music, automotive, sports, in fact for any product that can benefit from having a moving, dynamic desktop to offer.
